Low Lita is the new, wide chair from SLIDE created by Paola Navone. The design has a thin, clean cut back and seat, contrasting with the four wide legs which support it and give it visual and practical solidity. The slightly curved profile of the base, on which the seat develops towards the sides, makes Low Lita particularly inviting and comfortable.

Practical and easy to use in the open air in gardens and on terraces, it becomes the unquestioned protagonist in the home and in public areas. Low Lita, like all SLIDE products, is made in polyethylene for rotational moulding and is available in various colours: from brilliant green to the strong shades of orange and red, as well as the elegant black and ivory.
